 Ramsar site boundary

 Icecap

70°0'0"N

60°0'0"N

Inadequate coverage, but probably low density away from restricted hot spots in a few lowland areas

Generally adequate coverage, very high densities in restricted lowland areas extremely low densities elsewhere

Qinnquata Marraa and Kuussuaq

Kuannersuit Kuussuat

Aqajarua (Mudderbugten) and Sullorsuaq (Kvandalen)

Naternaq

Locally adequate coverage, very low densities everywhere, geese only present in a few restricted lowland areas

Adequate coverage, very high densities in extensive lowland areas, lower densities in more solid upland areas

Eqalummiut Nunaat and Nassuttuup Nunaa

Adequate coverage, moderate to high densities over large areas of extensive lowland areas, lower densities in more solid upland areas

Generally adequate coverage, very low densities throughout, especially in extensive lowland areas close to sea and in the uplands, some small pockets of higher density in continental lowlands
