

TABLE 1 LOWER LOUGH MACNEAN

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
07/1/94	Cushrush Island - H119 377	60	-	-	-	Feeding in tight flock, in open grassland
10/1/94	Cushrush Island - H120 377	58	-	-	-	Feeding along shore of Island in Juncus; more GWF probably present, but obscured. At dusk started to bunch up on N side of Island. Apparently no movement after dark so assume slipped into lough to roost.
11/1/94	Field near Gortatole - H117 369	27	-	-	-	Some geese preening in Lough and rest feeding in juncus on lough shore, at edge of improved open grass field
11/1/94	Cushrush Island - H 119 379	60	-	-	-	Grazing in open grassland. At dusk bunched up into a tight flock and moved to the S edge of the Island. Roosted on lough?

LOWER LOUGH MACNEAN

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
23/1/94	Lower Lough Macnean Area	0	-	-	-	Sheep have just been put on Island. Perhaps disturbed from area. Possibly hidden.
24/1/94	Cushrush Island - H119 378	61	-	-	-	Grazing in tight flock in open grass
02/2/94	Field near Gortatole - H118 369	61	16	3	42	Grazing/resting in open grass field, very settled.
02/2/94	Cushrush Island - H119 377	61	51	3	7	Grazing in open grass. At dusk, tight flock formed on N side of Island, there were a few goose calls after dusk; assume went into Lough
09/2/94	Field near Gortatole - H118 369	58	-	-	-	Grazing in open grass field

LOWER LOUGH MACNEAN

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
09/2/94	Cushrush Island - H119 376	61	20	-	41	Grazing in open grass. At dusk, took off and flew 200 yds to the N of the Island and landed in the Lough
14/2/94	Field near Gortatole - H118 369	56	27	1	28	Very unsettled, very vigilant, constantly moving in & out of dips grazing in tight flock. Probably more birds present.
21/2/94	Cushrush Island - H119 377	61	24	2	35	Grazing in open grass-land
22/2/94	Field near Gortatole - H118 369	58/ 62	-	-	-	Taking shelter in the hollows in the field, due to blizzard
25/2/94	Field near Gortatole - H118 369	62	59	3	-	Grazing in open improved grass field

LOWER LOUGH MACNEAN

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
03/3/94	Field near Gortatole - H117 369	61	57	2	2	Grazing in open improved grass field. One neck band read A4X
09/3/94	Field near Gortatole - H118 369 to Cushrush Island - H120 376	61	-	-	-	Were grazing in field. Disturbed by farmer and activity at Gortatole, flew to Cushrush Island and began feeding in and out of Juncus.
11/3/94	Cushrush Island - H119 377	60	-	-	-	Estimate only. Grazing in open grass on N side of Island.
13/3/94	Field near Gortatole - H118 369	60	-	-	-	Partial count as on arrival birds disturbed by minibus and flew high to the West, heading towards Upper Macnean. Not relocated on Lower Lough.

LOWER LOUGH MACNEAN

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
11/3/94	Cushrush Island - H118 377	32	-	-	-	Partial count, as birds grazing in hollow between 2 hills. Very vigilant.
28/3/94	Cushrush Island - H119 377	55	-	-	-	Emerged from Juncus to feed in open grassland. Very spread out and relaxed. Some probably still in Juncus.

OTHER SITES VISITED NEAR LOWER LOUGH MACNEAN

DATE	SITE AND GRID REFERENCE	COMMENTS
09/2/94	Lough Ora & Ora More H06 42 & H05 64 area	Historical records of GWF here, but lough two thirds surrounded by by plantation, and the bog area drained, over grazed and turfed. Now looks unsuitable for feeding.
28/3/94	Upper Lough Macnean - H03 39	Drove round both sides, but very wooded around its shore, grazing is very rough, land very rocky. Unlikely to feed in this area, only places with potential were; Inishteige and Inishkeen Islands. Could be a potential alternative roost site.
28/3/94	Lattone Lough - H00 45	No suitable grazing around it and very close to the road, therefore unlikely to use this
28/3/94	Dean's Lough - G98 45 Co Leitrim	Unsuitable for feeding and possibly too small for roosting

TABLE 2 ANNAGHROE

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
09/1/94	Annaghroe H73 44	0				Flood gate had been tampered with, area completely dry
09/1/94	Kedew Loop Road H76 48 - H77 48 H77 49 - H76 49	0				Area has potential, but has been drained recently. Still has some wetter areas.
13/1/94	Leek (Monaghan) H727 446	60				Approx count, took off as arrived. Were in improved grass field.
13/1/94	Annaghroe H737 442	14	6	8		Feeding in grass area next to a drain.
13/1/94	Glaslough H72 41	0				Recent reports of GWF roosting here, found no evidence. To be watched at dusk.
13/1/94	Emy Lough H69 43	0				Historic roost site, no evidence of recent use. To be watched at dusk.

		TOTAL	ADULT	JUVENILE	?	
23/3/94	Leek H727 446 Annacramp Meadows H723 456	77-92				Two distinct flocks of approx 43 and 48 at Leek. Both flew at same time and became partially mixed. Twenty-nine landed at Annacramp, the rest at Leek.
23/3/94	Emy Lough H69 43	0				Listening at roost time.
23/3/94	Slieve Beagh, near Lough na Heery H56 44	0				Listening at roost time.
29/3/94	Annaghroe H73 44	0				No GWF found in any of these areas, which suggests there is another feeding site yet to be found.
29/3/94	Leek H72 44	0				
29/3/94	Annacramp Meadows H72 45	0				
29/3/94	Bondville House H75 41 H75 42	0				
29/3/94	White Lough H70 52	0				Historic info on geese roosting here. No GWF arrived to roost.

Other Sites Visited Near Annaghroe

DATE	SITE AND GRID REFERENCE	COMMENTS
09/1/94	Lough Enagh H75 46	Locals said geese sometimes use it, but too close to road, popular fishing spot. Unsuitable.
09/1/94	Creeve Lough H73 51	Unsuitable for roosting, surrounded by trees, plus popular for fishing.
09/1/94	Brantry Lough H74 53	As above.
16/2/94	Tynan Abbey H75 42 - H76 42 H75 41 - H76 43	Reports of GWF flying into the estate. Unlikely geese feed here; only suitable fields found too close to main Caledon/Middletown road. Checked the lough and found no evidence of GWF; 3/4 surrounded by trees although 2 reports of hearing geese over the abbey at dusk. Unlikely but possible.
23/2/94	Back Lough H67 44	Unlikely roost lough. Very close to houses and surrounded by trees.
23/2/94	Grove Lough H67 42	Unlikely roost lough. Too small.
23/2/94	Tullylough H67 42	Appeared as possible roost lough, although swans feeding nearby were later heard going to roost in Emy Lough.
01/3/94	Slieve Beagh/Lough Bradan H57 43	Historic records of GWFs using Slieve Beagh, no suitable areas for feeding near, no feathers found round lough.
10/3/94	Slieve Beagh - H 54 44, H55 43 H55 44, H56 43, H56 44, H57 43 H54 44, H58 43, H58 44, H58 44, H57 45, H56 42, H55 43, H54 43, H53 44 and H54 45	These squares are partially or totally unsuitable for GWF feeding there are no bog pools, lots of heathers, conifer plantations and extensive peat cutting. Some of the loughs in these areas are suitable for roosting, such as Lough na Heery where goose feathers were found.

TABLE 3 PETTIGOE PLATEAU

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
12/1/94	Brownhall, Donegal, G94 69	45				Feeding in open grass-land, took off when noticed observer.
12/1/94	Inishgoosk Island, Lough Derg, Donegal, H07 74	0				Historical records of birds on the Island. Unable to get a good view of it. Boat trip to be arranged.
12/1/94	Meenaghmore Lough - G99 64	?				Small flock heard to go into roost in Meenaghmore Lough at dusk.
17/1/94	Meenaghmore Lough - G99 64	?				Two flocks came in at dusk, first one came in across Tullynasidda Lough and the 2nd one came in from Mallybreen direction, both approx 6-10 birds
31/1/94	Tamur, Donegal, H034 684	22				Feeding in bog pools. Took off and landed near Lough Agnes bog

PETTIGOE PLATEAU

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
31/1/94	Meenaghmore Lough - G99 64	48+				Listening at roost time, heard four flocks flying in of; 6, 7, approx 20 + 12 birds. This is obviously an important roost site.
08/2/94	Derrynacrannog - G985 618	8				Initially flying in an eastern direction, until level with me (approx 1 km away) when they doubled back and headed north
17/2/94	Meenaghmore Lough - G99 64	0				Heard no GWF going into roost, but the weather was very bad, so may have come in undetected
28/2/94	Lough Rushen - H01 66	5				Were flying in low over Lough Rushen but rose up and circled round the Lough and headed North towards Tamur (H03 67)

PETTIGOE PLATEAU

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GEESE				COMMENTS
		TOTAL	ADULT	JUVENILE	?	
12/3/94	Meenaghmore Lough - G99 64	0				No geese were heard going in to roost. Again the weather was very bad.
23/3/94	Meenaghmore Lough G99 64	60-70				Flew in to roost at Meenaghmore, in a single large flock, from the Brownhall direction. Unusual to get such a large flock coming in together.
28/3/94	Meenaghmore Lough - G99 64	0				No GWF heard coming in to roost. Again weather very bad.
29/3/94	Meenaghmore Lough - G99 64	?				A flock of unknown size was heard flying in to roost after dark.

PETTIGOE PLATEAU - AREAS CHECKED FOR EVIDENCE OF FEEDING AND ROOSTING

DATE	SITE AND GRID REFERENCE	COMMENTS
17/1/94	Tullylough - H023 657	Bog pools in this area have signs of recent & older feeding
17/1/94	Lough Rushen - H017 655	Bog pools in this area have signs of recent & older feeding
17/1/94	Between Lough Rushen & Mallybreen Lough - H014 659	Bog pools in this area have signs of old feeding
17/1/94	Mallybreen Lough - H01 66	Found some old GWF feathers around the shore, possibly used as a roost Lough earlier in the season
17/1/94	Between Mallybreen Mountain & Breen Lough - H010 664	Bog pools in this area have signs of recent feeding
17/1/94	Between Mallybreen Lough & Breen Lough - H011 662	Bog pools in this area have signs of recent & older feeding
17/1/94	Breen Lough - H01 66	At SW end of Lough evidence of very recent feeding. Possibly also used as a roost lough, but may be too small
18/1/94	Mallybreen area, Meenatully Hill Lough Wee - H01 65, G99 65, G98 64	No additional feeding sites from above.
31/1/94	Lough Avely - H03 66 Tamur - H032 668 Donegal	Local farmer said the geese sometimes roost in this Lough and feed on the bog in the Tamur area - bog looked like good habitat
07/2/94	Pollintague Lough - G97 61	Evidence of recent feeding at the SW end of the Lough
07/2/94	Lough Nawalskey - G98 60	Joe Magee heard reports of birds using Lough Nawalskey but found no evidence

PETTIGOE PLATEAU - AREAS CHECKED FOR EVIDENCE OF FEEDING AND ROOSTING

DATE	SITE AND GRID REFERENCE	COMMENTS
07/2/94	G98 60, G98 61, G97 61	No evidence of feeding, whole area been extensively drained and turfed
08/2/94	Derrintrig Lough - G99 61	To east badly over grazed. To the west of the Lough, extensive turfing up to lough shore
08/2/94	G97 61, G98 61, G99 61	Over grazing and extensive turfing
08/2/94	G99 62	Most of this square has been planted with conifers. Large drainage ditches are affecting the bog area surrounding the plantation
08/2/94	Croagh - G98 63	Tussocky & overgrazed
08/2/94	Lough Nacroagh - G98 62	No good bog pools around it. Area drying up
08/2/94	Lough Nacroagh south to Derrintry - G98 62 - G99 61	Completely turfed
17/2/94	Tullyvogy Lough - H02 63	To the east, the area is turfed. To the north and west area grazed and drained. Extensive heather coverage.
17/2/94	Longhill - H02 64	Over-grazed and dry
17/2/94	Between Longhill & Black Hill H02 64	No suitable feeding areas
17/2/94	Tullymore Lough - H02 63, Tullylough Beg H02 63	No evidence of GWF in this area. Appears unsuitable.
22/2/94	Croagh Beg - H00 63	Evidence of recent feeding here

PETTIGOE PLATEAU - AREAS CHECKED FOR EVIDENCE OF FEEDING AND ROOSTING

DATE	SITE AND GRID REFERENCE	COMMENTS
22/2/94	Tullywannia Lough - G99 63	Lots of GWF feathers around the north end of the Lough. Also evidence of recent feeding at the south end of the Lough.
22/2/94	Rosscor Viaduct - H98 58	Joe Magee had a report of GWFs here, but when checked out, they were greylags, with a couple of barnacle geese
28/2/94	Tullylough - H021 658 & H017 656	Very recent evidence of feeding in these areas.
28/2/94	Lough Rushen - H01 66	No evidence of GWF roosting here
28/2/04	Between Lough Rushen - H01 66 & Mallybreen Lough H01 66	Some evidence of recent feeding in the bog pools between these two Loughs
28/2/94	Lough Vearty - G999 665	Evidence of recent feeding in the bog pools in this area
28/2/94	Mallybreen Mountain H005 656	Evidence of recent feeding in the bog pools in this area
15/3/94	Tamur - H03 67 Donegal	Joe Magee had reports of extensive GWF activity in this area recently

02/3/94	0					Lusty Beg - H26 34
02/3/94	0					Bunnahola Island - H31 33
15/3/94	32					Inishcollan - H322 319 Feeding in Juncus infested grass, in very tight flock. Very vigilant; possibly due to helicopter buzzing around.
15/3/94	0					Lusty Beg -H26 33
15/3/94	0					Inishmore - H27 35 & H27 36
15/3/94	0					Coolbeg area - H31 34
15/3/94	0					Bunnahola Island - H31 33
15/3/94	0					Inishroosk area - H31 32
29/3/94	0					H26 34

UPPER LOUGH ERNE

DATE	SITE AND GRID REFERENCE	NUMBER OF GREENLAND WHITE-FRONTED GESE			COMMENTS
		TOTAL	ADULT	JUVENILE	
29/3/94	Lough Barry & Inishmore H27 36	0			
29/3/94	Derryhowlaght Lough - H29 36	0			
29/3/94	Lough Digh - H32 33	0			
29/3/94	Drumlaght - H33 34	0			
29/3/94	Bunnahola - H31 33	0			
29/3/94	Inishroosk - H31 33	0			
29/3/94	Inishcollan - H32 33	0			
29/3/94	Kilmore Lough Key - H33 31	0			
29/3/94	Inishleague Island - H30 32				Local farmer said the GWF used grassy hollows on this island frequently.

TABLE 6 HISTORIC & OTHER RECORDS

DATE	SITE AND GRID REFERENCE	COMMENTS
01/2/94	Killeter Goose Lawn - H08 82	Bog in relatively good condition. But no evidence of any GWF's. The trees were planted around it about 1977 and the last report of GWF there was about 1982, so perhaps the geese moved away when the site became too enclosed.
11/2/94	Antrim Plateau, Moyarget Wood & Clare Wood - D05 38 & D06 41	Last reported sighting of GWF in this area was two years ago. Area is extensively turfed and has new conifer plantations. Unlikely to be used by the geese now.
04/3/94	Leitrim Hill & Crillys Hill H21 80 & H21 79	Habitat on the tops of the hills unsuitable. The wetter grass fields lower down have some feeding potential. The local farmer hadn't seen geese around for years
04/3/94	Seegronan Hill - H19 77 & H19 78	No suitable feeding areas
04/3/94	Carrickaholten area - H20 76	Received recent reports of birds in this area. But no feeding sites here. It is possible they may roost in one of the loughs, but no evidence of this was found.
04/3/94	Essan - H11 78 & H12 78	No suitable feeding areas
04/3/94	Sturrin - H10 78	No suitable feeding areas
04/3/94	Crockarthur - H17 75 & H17 76	Area looked as if it had feeding potential, again possibly a bit dry. Worth a closer look.

HISTORIC & OTHER SITES

DATE	SITE AND GRID REFERENCE	COMMENTS
04/3/94	Mullyfabeg area H11 79 & H12 79	Area looked as if it had feeding potential, again possibly a bit dry. Worth a closer look.
07/3/94	Downpatrick Marshes	Checked along the Annacloy river from Downpatrick J47 45 to Killmore J44 50 and around Hollymount J46 43. No evidence of GWF's was found, but the habitat still has the potential for geese. No records since early 1980s.
11/3/94	Inishgoosk Island, Lough Derg H07 74 Donegal	As the boat approached the Island, approx, 30 GWF (& 9 Greylags) took off from the Island. In the open grass areas of the Island there was extensive evidence of geese feeding. May associate with Pettigo birds.
11/3/94	Parkhill Lough - H22 62	Last report of GWF roosting in this Lough was ten years ago. Were Canada geese here. No evidence of GWF's found, but worth a listen at dusk possibly
11/3/94	Ross Lough H25 61	Last report of GWF roosting here was ten years ago. Since then the water table has been altered. Unlikely to be used.
18/3/94	Ann's Point, Strangford Lough J558 688	Four GWF were seen here by Davy Andrews of National Trust.
22/3/94	Lough Fea - H75 86	Reported sightings of GWF here at the beginning of season. No geese were heard coming in to roost
31/3/94 &	Ann's Point, Strangford Lough J558 688	Four GWF: 3 Adults, 1 juvenile, were seen by Davy Andrews of NT. They are different from the previous report.

NOTE: When a site was visited more than once in the same day, the highest count is given. If in different position or behaviour, then both records given
